

Capability Statement

Who We Are

EPSoft Technologies is a **technology consulting and digital transformation** services firm established in 2015 and based in Irving, Texas. EPSoft provides comprehensive implementation, support, and consulting services – helping clients build an end-to-end digital strategy roadmap for their technology modernization and AI journey. Our **core focus lies in automation** with an **AI-first** mindset, leveraging the capabilities of our innovative **EZFlow** platform to help organizations derive critical insights and achieve optimal performance. EZFlow integrates user-friendly tools for robotic process automation (RPA), intelligent automation (IA), and process intelligence, seamlessly combining with other automation technologies.

EPSoft is a proud, committed WBENC-certified WBE.
